Performance You Demand. Reliability You Trust.

# HISTORY

Quincy Compressor was founded by entrepreneurs and innovators. Dairy farmers were the first to benefit from their expertise in the vacuum pump business with an efficient cow-milking machine. From these humble beginnings in 1920, Quincy Compressor has evolved to meet changing customer demands and grown into an international company with a reputation for quality, reliability, performance and value.

Today, Quincy Compressor is a leading designer and manufacturer of reciprocating and rotary screw air compressors, vacuum pumps and a full line of air treatment components. Quincy has been setting industry standards for nearly a century.

While Quincy Compressor products are American-made — designed and manufactured in Quincy, Illinois, and Bay Minette, Alabama — these products are installed around the world in an array of industries that represent a myriad of applications.

# RELIABILITY

Quincy Compressor is on the cutting edge, engineering reliability and quality into every product. In fact, our specialty is manufacturing the industry's most reliable airends and pumps, which become the heart of every rotary screw and reciprocating air compressor.

All Quincy reciprocating and rotary screw compressors are designed to perform in demanding conditions for years. For example, our flagship QR-25 reciprocating compressor stands as a symbol of quality throughout the industry more than 70 years after it was first introduced. Our compressors' rugged reliability allows them to withstand even the harshest environments. So wherever you need us to be, we deliver proven, dependable performance to get the job done.

Quincy Compressor products feature reliability wrapped in technological advances that makes them more energy efficient — and ultimately, more cost efficient. With this reliability, comes our innovative 10-year airend warranty and 5-year pump warranty, widely recognized as the compressed air industry's strongest standard warranty program. The Royal Blue and True Blue Warranties underscore our commitment to quality, and it means we puts our money where our mouth is.

# PERFORMANCE

Quincy Compressor has been building air compressors for nearly 100 years and we know what it takes to make them tough and reliable — for long-term performance. During the past century, we've earned our reputation for exceptional workmanship, service and dependability and have become an industry symbol of quality.

Even in the most demanding conditions, Quincy delivers proven, reliable performance. From ocean-based oil rigs with salty air and high humidity to the extreme heat and dust of a foundry, Quincy compressors maintain their industry-leading performance and durability year after year. And no downtime means better, more cost-efficient, long-term operation.

Quincy builds air compressors with options from ½ horsepower to 500 horsepower to suit nearly every application. Quincy's reputation for rugged reliability, low cost of ownership and power-saving performance are just a few of the reasons why Quincy keeps winning over the world's most demanding customers.

# PRODUCTS

Quincy Compressor understands the compressed air challenges that face your industry. That's why we design our products to provide solutions to important air system demands such as stable air pressure, energy savings, high efficiency, quiet operation, small footprints, low maintenance, modular design and longer life. The wide array of Quincy's products offers reliable solutions for nearly every application.

## Rotary Screw Compressors

The rotary screw compressor line ranges from 5hp to 500hp and offers quiet, reliable 24-hour operation. Top selling rotary models are backed by Quincy's 10-year Royal Blue Warranty, the industry's strongest standard warranty program.

## Reciprocating Compressors

The Quincy QR-25 has proven its performance for more than 70 years as a symbol of quality throughout the industry. These same durable characteristics have since become a part of Quincy's complete reciprocating line, ranging from 1/2 hp to 30hp -- featuring high-efficiency, low-maintenance, performance and a 5-year True Blue Warranty.

## Vacuum Pumps

With our compressor manufacturing and engineering expertise, Quincy Compressor has created a complete vacuum system line with all of the quality built into our compressors. Quincy's unique modulation valve delivers full flow from zero to ultimate vacuum. Quincy Compressor is the most reliable source for vacuum solutions.

## Parts and Accessories

Genuine Quincy Compressor parts are manufactured to the same quality standards as our compressors. They are designed to keep your compressor or vacuum pump running at peak performance and have been proven to provide the best protection of your investment. Maintain or extend the life of your warranty by using only genuine Quincy Compressor parts.

# ENGINEERING

One-size air compressor does not fit all applications. That's why Quincy Compressor builds custom units to meet your exact needs — for a perfect fit. You can work directly with our engineers to design your compressor to your specifications, whether you need a large or small customization, for a one-of-a-kind solution. With our expertise and can-do attitude, your custom-engineered, designed and built compressor will be completed precisely to your specifications.

Our compressors are engineered for rugged use and long life. We set high standards for our components manufacturers, too. That means the entire product supports our reputation for superior quality.

In addition, Quincy is a member of Compressed Air and Gas Institute (CAGI). What does this mean to you? It means we're always striving to increase the energy efficiency and performance of our products. It also means we're committed to providing you the highest standards and best-practice solutions.

# SERVICE

Quincy Compressor partners with a strong network of distributors to serve customers. Distributors help customers determine which Quincy product will best fit their needs and educate them on the impact Quincy products can have on their bottom line. More than ever, companies are faced with the challenge of reducing costs. We're able to help companies do this through our patented Efficiency Quotient (EQ™) air system audits.

Quincy's EQ auditing service offers air compressed users a way to independently evaluate your compressed air systems and improve overall efficiency. In addition, one of our knowledgeable network distributors is always happy to help with a more detailed report customized for your unique system that identifies additional opportunities for energy-savings.

This valuable, award-winning EQ service has helped companies receive energy rebates and reduce energy consumption, which ultimately leads to reduced carbon emissions and lower energy costs.

# VALUE

Compressed air is considered the fourth utility for companies. Generating compressed air accounts for 10 percent of the total industrial energy used in the U.S. To stay competitive in the global market, you need a partner that offers proven solutions to finding cost savings for your compressed air systems. That's just one more area where Quincy can make an important difference in your company's bottom line.

At Quincy Compressor, we've developed our own initiatives targeting sustainability and we're focused on helping our customers reach their sustainability goals with more efficient use of energy to reduce costs. For example, our QGV variable speed compressors help control energy costs by fluctuating output with demand. Overall, we build energy-efficient compressed air systems to reduce your long-term cost of ownership.
